

Software Engineer (Binefar). R+D

We build modern web applications for Cash Management at Sallén (Gunnebo Group) More than 10.000 devices around the world are running our web applications on embedded systems.

We are searching BackEnd and FrontEnd developers to join to our Software R&D Department. The hired persona will work closely with Software team (10) and Electronical/Mechanical Engineers (20+).

The persona will be responsible of new developments, bug fixing, releases management and documentation on the software platform:

- Integration of user-facing elements developed by front-end developers with server-side logic.
- Writing reusable, testable, and efficient code.
- Design and implementation of low-latency, high-availability, and performant applications.
- Implementation of security and data protection.
- Releases management.
- Manufacturing procedures definition
